1. Title: **A metaheuristic optimization approach for a real-world stochastic flexible flow shop problem with limited buffer**  
 Author(s): Almeder, C; Hartl, R.  
 Source: International Journal of Production Economics Published: **2013**  
 Times Cited: **1** (from Web of Science)
2. Title: **A swarm intelligence based sample average approximation algorithm for the capacitated reliable facility location problem**  
 Author(s): Aydin, N; Murat, A.  
 Source: International Journal of Production Economics Published: **2013**  
 Times Cited: **1** (from Web of Science)
3. Title: **A variable neighborhood search method for the orienteering problem with hotel selection**  
 Author(s): Divsalar, A; Vansteenwegen, P; Cattrysse, D.  
 Source: International Journal of Production Economics Published: **2013**  
 Times Cited: **1** (from Web of Science)
4. Title: **Routing and dispatching of multiple mobile agents in integrated enterprises**  
 Author(s): Elalouf, A; Levner, E; Cheng, T.C.E.  
 Source: International Journal of Production Economics Published: **2013**  
 Times Cited: **1** (from Web of Science)
5. Title: **A parallel variable neighborhood search for the multi-objective sustainable post-sales network design problem**  
 Author(s): Eskandarpour, M; Zegordi, S.H; Nikbakhsh, E.  
 Source: International Journal of Production Economics Published: **2013**  
 Times Cited: **1** (from Web of Science)
6. Title: **Fourth party logistics routing problem with fuzzy duration time**  
 Author(s): Huang, M; Cui, Y; Yang, S; et al.  
 Source: International Journal of Production Economics Published: **2013**  
 Times Cited: **1** (from Web of Science)  
[\[Show additional data\]](#)
7. Title: **Chemical-reaction optimization for solving fuzzy job-shop scheduling problem with flexible maintenance activities. International**  
 Author(s): Li, J; Pan, Q.  
 Source: Journal of Production Economics Published: **2013**  
 Times Cited: **1** (from Web of Science)

- 8. Title: **Optimising safety stock placement and lead time in an assembly supply chain using bi-objective MAX-MIN ant system**  
Author(s): Moncayo-Martinez, LA; Zhang, D.Z.  
Source: International Journal of Production Economics Published: 2013  
Times Cited: 1 (from Web of Science)
- 9. Title: **A metaheuristic algorithm to solve the selection of transportation channels in supply chain design**  
Author(s): Olivares-Benitez, E; Rios-Mercado, R.Z; Gonzalez-Velarde, J.L.  
Source: International Journal of Production Economics Published: 2013  
Times Cited: 1 (from Web of Science)
- 10. Title: **Evolutionary generation of dispatching rule sets for complex dynamic scheduling problems**  
Author(s): Pickardt, C.W; Hildebrandt, T; Branke, J; et al.  
Source: International Journal of Production Economics Published: 2013  
Times Cited: 1 (from Web of Science)  
[\[Show additional data\]](#)
- 11. Title: **Stochastic capacity planning and dynamic network design**  
Author(s): Pimentel, B.S; Mateus, G.R; Almeida, F.A.  
Source: International Journal of Production Economics Published: 2013  
Times Cited: 1 (from Web of Science)
- 12. Title: **A matheuristic for aggregate production-distribution planning with mould sharing**  
Author(s): Raa, B; Dullaert, W; Aghezzaf, E.  
Source: International Journal of Production Economics Published: 2013  
Times Cited: 1 (from Web of Science)
- 13. Title: **A constraint programming approach to designing a newspaper distribution system**  
Author(s): Russell, R.  
Source: International Journal of Production Economics Published: 2013  
Times Cited: 1 (from Web of Science)
- 14. Title: **Retail inventory management with stock-out based dynamic demand substitution**  
Author(s): Tan, B; Karabati, S.  
Source: International Journal of Production Economics Published: 2013  
Times Cited: 1 (from Web of Science)
- 15. Title: **Dynamic lot sizing for a warm/cold process: heuristics and insights**  
Author(s): Toy, A.O; Berk, E.  
Source: International Journal of Production Economics Published: 2013  
Times Cited: 1 (from Web of Science)
- 16. Title: **A hybrid genetic algorithm for the job shop scheduling problem with practical considerations for manufacturing costs: investigations motivated by vehicle production**  
Author(s): Zhang, R; Chang, P; Wu, C.  
Source: International Journal of Production Economics Published: 2013  
Times Cited: 1 (from Web of Science)
