
Call for Papers

Special Issue of *Annals of Operations Research* on Operations Research and Systems (ALIO-SMIO)

Guest Editors:

Roger Z. Ríos-Mercado, José Luis González-Velarde, and Manuel Laguna

The Latin-Iberian-American Conferences on Operations Research (CLAIO), held biannually since 1982, and the Mexican Society of Operations Research (SMIO) meetings highlight recent developments in theory, models, algorithms, and applications of operations research. Numerous papers presented at these conferences have included high-quality research that addresses complex optimization and decision-making problems employing operations research strategies from both deterministic and stochastic approaches.

The aim of this issue is to collect the high quality work presented at the Joint ALIO-SMIO Conference held in Monterrey, Mexico, October 6-10, 2014. It is within the scope of this issue to include contributions in modeling, theory, algorithms, and practice of successful applications of operations research in its broadest sense. Papers not presented at the conference are welcome, thus this is open to the OR community worldwide.

Authors must submit their manuscripts using Springer's web-based system, Editorial Manager, at <http://editorialmanager.com/anor/> by the deadline given below. Manuscripts received after the deadline may not be considered for the special issue and may be transferred to a regular issue. Within the Editorial Manager, please choose "SI: CLAIO 2014" as the article type. All manuscripts should be written in English and prepared in accordance with the journal's instructions for authors available at the journal web site (see below). Papers will be subject to a strict review process managed by the Guest Editors and accepted papers will be published online individually, before print publication.

Guest Editors

Professor Roger Z. Ríos-Mercado (Coordinator)
Graduate Program in Systems Engineering
Universidad Autónoma de Nuevo León, Mexico

Professor José Luis González-Velarde
Center for Quality and Manufacturing
Tecnológico de Monterrey, Mexico

Professor Manuel Laguna
Leeds School of Business
University of Colorado, USA
