CONACYT

To whom it may concern:

I write regarding Miss Mónica Guadalupe Elizondo Amaya. Mónica is full-time student in the Graduate Program in Systems Engineering at the Universidad Autónoma de Nuevo León (UANL). Roger Z. Ros-Mercado, a professor at UANL, is Mónica's primary dissertation adviser, and I am serving as her co-adviser. She has carried out academic research during multiple visits with my research group in the Graduate Program in Operations Research & Industrial Engineering at The University of Texas at Austin. I write now to verify that she visited and we discussed her dissertation research during the period October 27-October 30 of this year.

Please do not hesitate to contact me should you require additional information.

Sincerely,

David Morton  
Engineering Foundation Professor
